Profile

My name is Aizad and I have a passion for crafting compelling digital experiences that thrive on the internet. My interest in web development began in 2016 when I had the opportunity to experiment with building a custom website using HTML, CSS, and JavaScript. This allowed me to gain a deeper understanding of web development and improve my skills in these technologies.

I quickly realised my love for this field and decided to pursue it further. Since then, I have been fortunate enough to work with a start-up, where I have gained valuable experience in building accessible and inclusive products for diverse clients. My primary focus now is to continue honing my skills in web development and creating exceptional digital experiences that meet the highest standards of quality and user satisfaction.

Experience

WEB DEVELOPER, INFERENCE TECH .SDN .BHD, SHAH ALAM, MALAYSIA – JUN 2021 - PRESENT

- Develop web portal for Malaysian government sector client to manage and monitor real time-based road defect (loophole, faded landmarking) and analyse it using AI technology.
- Web portal for GLC healthcare client for admin (doctor, pharmacist, participants clinics) and users to carry out telemedicine services that include consultation and prescription services.
- Build a dashboard using JavaScript for telco service provider to monitor their project progress that can filter by region and site inventory
- Build a web application for hajj pilgrims organization for their hajj participant preparation before perform pilgrimage, that include ebook for reference and examination to verify their readiness before perform the worship.

FRONT-END DEVELOPER, DELYVA .SDN .BHD, ARA DAMANSARA, MALAYSIA – SEP 2019 - MAY 2021

- Played a key role in the development of a SAAS project that included the creation of revenue and sales monitoring dashboards, tracking orders and shipments, and customising air waybills for courier service providers. This project required expertise in designing and implementing complex data visualisation tools, integrating various APIs and technologies, and building secure and scalable web applications. The revenue and sales dashboard enabled clients to track and analyze their business metrics, while the order and shipment tracking feature

streamlined logistics processes. Additionally, the air waybill customisation allowed clients to brand their shipment documents and improve customer experience. Overall, this project helped clients optimise their operations and achieve better business outcomes.

FRONT-END DEVELOPER, AERODYNE, PHELIO DAMANSARA, MALAYSIA – AUG 2018 - SEP - 2019

- Design and maintain a secure web portal for an oil and gas company that manages work records, application requests, and digitises paperwork. The portal will provide a user-friendly interface that streamlines the process of managing employee records, work applications, and other essential documents. Robust security measures will be implemented to ensure the confidentiality and integrity of the data stored within the portal. Regular maintenance and updates will also be carried out to ensure the portal's smooth operation.

GRAPHIC DESIGNER, IRIDEA .SDN .BHD, KINRARA BK5, MALAYSIA – JAN 2017 - AUG 2018

- Created several mockups and storyboards for the "Finding Your Own Chef" application. The mockups included designs for the user interface, user experience, and overall branding of the application. The storyboards demonstrated how users would interact with the application, and showcased how the different features would work together. The goal was to create a user-friendly and visually appealing application that allowed users to easily find and book a private chef for their special events. By incorporating feedback from stakeholders and utilizing the latest design trends, I ensured that the final product would meet user needs and exceed expectations. Offered design solutions that effectively solved problems and enhanced advertising goals.
- Created a variety of design assets for businesses, including business cards, letterheads, banners, ads, infographics, video animation and logos. Assisted in the creation of graphic materials for the use of the marketing department.

EDUCATION BACKGROUND

University Kuala Lumpur Malaysian Institute of Information Technology (MIIT), Kuala Lumpur, Malaysia – HIGHER NATIONAL DIPLOMA IN MULTIMEDIA

Skills

- **Programming Languages**

JavaScript (ES6), TypeScript, HTML, CSS/Sass

- **Libraries & Frameworks**

React, Vue, Redux, Ant Design, Material UI, Bootstrap

- **Tools & Platforms**

Git, Gulp, Webpack, Netlify

- **Design**

Figma, Adobe Illustrator, Sketch, Adobe XD, Sketch
